# Running the Caliper2PC Software under Window 7
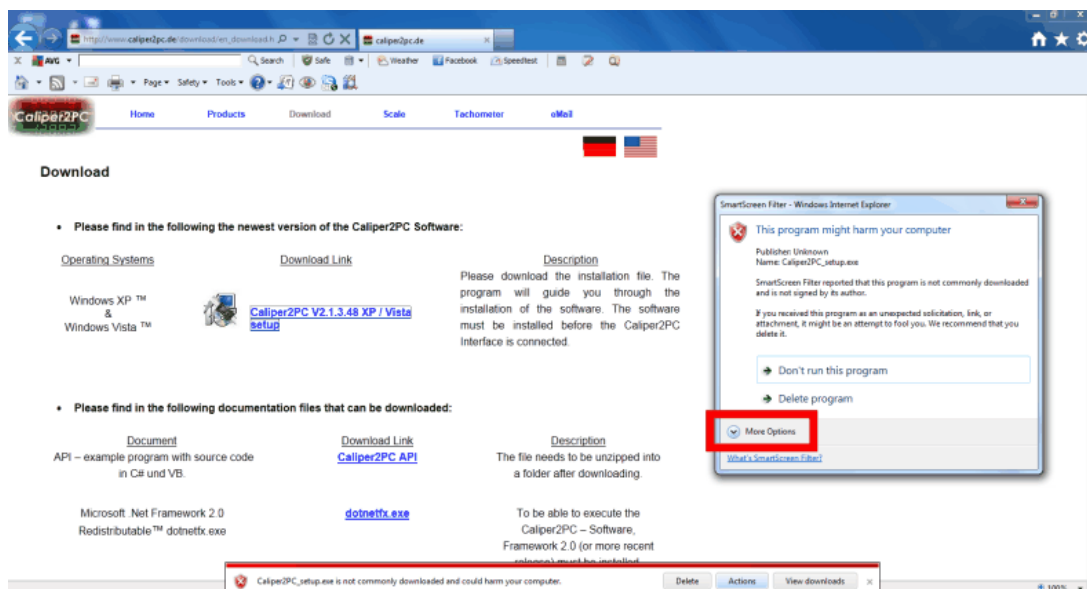

When downloading the Caliper2PC software the following message pops up:

*"Caliper2PC_setup.exe is not commonly downloaded and could harm your Computer."*

Click on the "Actions" button.

Open the drop-down menu by clicking the "More Options" button. Choose the "Run anyway" option and install the Caliper2PC software.

After the installation process has finished the software can be launched by right clicking the Caliper2PC icon on the desktop and choosing "Run as administrator".
